

NOTICE OF ROADWAY IMPROVEMENTS
ALCOSTA BOULEVARD PAVEMENT REHABILITATION
(FROM SAN RAMON VALLEY BOULEVARD TO FIRCREST LANE)

Planned Construction Period: September to December, 2012

The construction of Alcosta Boulevard Pavement Rehabilitation Project is scheduled to begin within the next two weeks.

The proposed improvements will include asphalt concrete pavement rehabilitation; concrete curb, gutter, sidewalk, median curb, and curb ramp replacements; traffic signal detector loop replacements; and pavement striping and markings installations. Construction phase of the project is scheduled for completion by December 2012.

In order to complete the proposed improvements, lane closures and traffic controls will be established. These traffic control measures will temporarily reduce the width of the roadway to a single lane in each direction during certain hours. Various portions of the roadway between San Ramon Valley Boulevard and Fircrest Lane may be temporarily blocked as the work progresses; however, the Contractor will be required to maintain access to all businesses and residences. Please be advised that the construction sequences require excavating and paving the section of Alcosta Boulevard from San Ramon Valley Boulevard to the northbound I-680 On-ramp at night in order to avoid major traffic backups and disruptions to residents during the daytime hours. Lane closures and traffic controls will be established for the planned night work as well.

The City asks for your cooperation and consideration while construction is underway. Please drive carefully through the construction zones. While the project has been planned to minimize impacts to the traveling public, some construction impacts and inconvenience cannot be avoided. As with any major roadway construction, traffic delays and temporary lane closures should be expected.

The City has contracted with MCK Services Inc. of Martinez to perform the roadway improvement work. The following contact information is provided in case you have questions or concerns regarding this project:

Contact Information:

City of San Ramon

Project Manager : Peter Phoon
Telephone No. : (925) 973-2675
Email : pphoon@sanramon.ca.gov

MCK Services Inc., Contractor

Project Manager : John Moffat
Telephone No. : (925) 957-9200
